

Instructions:

Work with APIs:

1. Look up an API that you want to use for your project.
2. Import your API to your project.
3. Create a list of different items(ex. movies, books, games). Each item should have a their own properties that you get from your API
4. Create a search bar. In this search-bar, the user should be able to search for a specifik item that they are looking for

Bellow is a Figma file with a design that I want you to use. Good luck!
